

SITE MANAGER REPORT APRIL 2026

Unscheduled Repairs

1. **Water Leak in Geography Resources Store** – A pipe leaking behind the panels of RL classroom ablutions caused water ingress in to the fabric of the wall between there and the geography resources room. This has been dried out using a dehumidifier and repair to the wall will take place in the coming weeks.
2. **New Health and Safety Advisor** – Sarah Wood of EFM carried out her first visit during the Easter break.

There is nothing else of significance to report.
